Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-12 specifically require a picker driver driving the picker to a third stop position spaced farther away from the shuttle than a second position wherein the second position is spaced farther away from the shuttle than a first position.

Claim 13 specifically requires a moving check preventing the picker from moving from the first or second stop position to the third stop position, the moving stop including a covering member attached to the bed so that the covering member is closed and opened, the covering member in a closed state abutting the picker thereby preventing the picker from moving to the third stop position, the covering member in an open state allowing the picker to move to the third stop position, wherein the picker driver includes an actuator capable of driving the picker to the first and second stop positions and a biasing unit biasing the picker in such a direction that the picker abuts the covering member, and a biasing force of the biasing unit moves the picker to the third stop position when the covering member is open.

Claim 14 specifically requires a picker control program for use in a sewing machine, the program comprising a picker retreating routine in which the picker retreats from the first or second stop position to the third stop position when the input device is supplied with the command signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
